-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see the remarks, filed 12/02/2004, with respect to the rejection(s) of claim(s) 1 and 2 under 103 U.S.C. have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Nakamura et al (US 5,627,583).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nakamura et al. (US 5,627,583).

Re claim 1, Nakamura discloses an electronic endoscope apparatus, including: a first electronic endoscope (51 of fig. 6, 1 of fig. 2) having a first imaging device (11 of figs. 2 and 6); a second electronic endoscope (B of fig. 1; 2 of fig. 2; 52 of fig. 6) having a second imaging device (12 of fig. 2) of which pixel density is different from that of said first image device, and having a second drive pulse generation circuit (41 and 42 of fig. 5) for generating drive pulses to drive the second imaging device; and a processor unit (53 of fig. 6) for connecting said first (1) or second electronic endoscope (2), wherein the processor unit comprises:

Art Unit: 2613

a first drive pulse generation circuit (21 of fig. 4) for generating drive pulses to drive said first imaging device (11); a selection circuit (56 of fig. 6) for activating the second drive pulse generation circuit (41 of fig. 5) when said second electronic endoscope (52 of fig. 5) is connected; a synchronization circuit (42 of fig. 5) for forming synchronizing signals which are synchronous with the drive pulse of said second drive pulse generation circuit, a signal processing circuit (16 of fig. 6) for performing image processing on the output signal from said first imaging device when said first electronic endoscope is connected, and for performing image processing on the output signal from the second imaging device by inputting the synchronizing signals from said synchronization circuit when the second electronic endoscope is connected; and wherein a determination circuit (56 of fig. 6, e.g. the CPU has means for performing the identification of endoscope types) for automatically determining the type of the electronic endoscope (A or B figs. 1A and 1B) which is connected to said processor unit is provided, and said selection circuit and synchronization circuit are operated based on the determination of the determination circuit (col. 7, lines 14-32).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lankford (US 5,682,199) discloses a video endoscope with interchangeable endoscope heads.

Art Unit: 2613
